

Infinity Lube minimizing the risks of component failure in Wind Turbines Low Maintenance and Reliability are the key factors in Wind Turbine profits and sustainability. Closely monitoring a well-regulated computerized Vibration program determining the Turbines lubrication components is vital. SUREnergy is a highly reputable Wind Turbine installation and Maintenance company located in Sandusky Ohio.

Climbing a Wind Turbine at 3:00am is no fun task especially when it could have been avoided. Determining what lubricants to use in these Environments has been a nightmare and a wrong decision could cause a fire over a hundred feet in the air. Infinity Lube has been tested for close to a year by SUREnergy and the facts are clear. Infinity Lube is the new standard for wind turbine reliability. Listed below are the before vibrations and the after when applying the Infinity Lube Grease in the Simalube automatic greasers. Note the vibration reductions from frame one to frame two. The Technology of Infinity Lube provides the perfect solution for Turbine lubrication.
